See the Truth Before You Decide: Real People. Real Reviews.

The Hardware-Verified 60-Second Video Review & B2B Trust Platform for Local Commerce, Consumer Places, and Online Brands

Entity & Pronunciation: Yooz (pronounced */ju:z/* — "Use" or "Yooz") • **Live Web Application: https://www.yoouz.com/** • **Investor Relations:** investor-relations@yoouz.com

01. Executive Summary & Core Mission

Online text reviews are facing a permanent crisis of trust. Because of generative AI chatbots, paid click-farms, and fake 1-star review extortion, everyday consumers can no longer tell the difference between an honest customer opinion and a fake review. Over 93% of people check reviews before they buy a product or visit a local business, yet traditional text reviews have become unreliable—costing honest businesses $152 billion every year.

Yooz Inc. (pronounced */ju:z/*, like "Use") solves this $152 billion trust problem with a simple, unhackable rule: **every review must be recorded live on the spot using the phone's front-facing selfie camera, capped at 60 seconds, with zero uploads allowed from the phone's photo gallery**. By replacing anonymous blocks of text with real human faces, real voices, and genuine reactions streamed instantly via Bunny.net, Yooz creates the gold standard for trust in modern shopping and local dining.

> **Why Yooz Wins (The Investment Summary):** Yooz is not just an idea on paper—it is a 100% finished, live web application operating right now at **yoouz.com** across **75+ international languages**. Businesses pay a flat **$149/month ($1,788/year)** subscription to unlock tabletop QR code stands, 1-click TikTok/Instagram video ad exports, and embeddable website video carousels that boost checkout conversion by up to 300%. Because our video streaming runs on ultra-low-cost Bunny.net edge servers, Yooz keeps **over 88% gross profit margin** on every subscription.

Core Pillar	How It Works	Why It Matters to Investors & Businesses
100% Live Human Proof	**Front-Camera Only (No Uploads)**	Reviewers cannot upload pre-edited videos from their camera roll. Seeing a real person's face and hearing their voice eliminates AI bots and fake reviews.
60-Second Time Limit	**Maximum 1 Minute per Review**	Keeps reviews short, punchy, and honest without boring filler—resulting in an 88%+ watch completion rate (compared to 12% on text review sites).

Core Pillar	How It Works	Why It Matters to Investors & Businesses
No Pay-to-Remove Extortion	**100% Independent Credibility**	Businesses can never pay Yoouz to hide, alter, or delete honest reviews. Instead, verified owners can post official video or text replies to customers.
B2B Merchant Subscription	**$149 / Month ($1,788 / Year)**	Gives businesses tabletop QR stands, 1-click branded 9:16 video ads for Meta/TikTok, and website video widgets (boosting conversion by 32% to 300%+).
Global Edge Technology	**Bunny.net CDN + 75+ Languages**	Streams video globally at $0.005/GB (90% cheaper than AWS), includes native AI search indexing (`llms.txt` & Knowledge Graph), and yields >88% gross margin.

02. Complete Platform Guide & 18-Section Breakdown

This document is designed so any investor, partner, or business owner can clearly understand every part of the Yoouz platform—from how a customer records a 60-second video to how Yoouz generates recurring software revenue:

Sec.	Platform & Business Topic	Sec.	Platform & Business Topic
01	Executive Summary & Core Mission	**10**	The Recording Studio: Hardware Camera Lock
02	Complete Platform Guide & Document Overview	**11**	Interactive Map & Local Neighborhood Discovery
03	The Market Problem: The $152B Fake Review Crisis	**12**	Yoouz for Business: Claiming, Privacy & Zero Extortion
04	The Yoouz Solution: 60-Second Live Video Protocol	**13**	B2B Growth: Tabletop QR Tents & Free User Growth

09	Business Profile Pages & Customer Action Buttons	**18**	Growth Roadmap, POS Integrations & Investment Summary

03. The Market Problem: The $152B Fake Review Crisis

While 93% of shoppers rely on online reviews before visiting a restaurant, hiring a service, or buying a product online, trust in traditional text reviews has collapsed for three simple reasons:

Crisis Vector	Market Metric	Structural Failure on Legacy Platforms
01. Generative AI & Bot Farms	**42% – 54%** Estimated Fake or AI Reviews	Large language models allow bad actors to generate thousands of realistic 5-star promotions or coordinated 1-star smear campaigns in seconds. Static star ratings have lost empirical credibility.
02. Reputational Extortion & Fraud	**$152 Billion** Annual Global Fraud Cost	Anonymous accounts weaponize 1-star reviews on Google Maps and Yelp to extort restaurants, clinics, and contractors, forcing honest SMBs to pay predatory reputation agencies.
03. The Gen-Z Visual Disconnect	**84% of Gen-Z** Prefer Short Video	Modern digital natives refuse to read unverified walls of text. Consumers demand to see real lighting, portion sizes, ambiance, and product texture while hearing authentic human vocal inflection.

Why Legacy Incumbents Are Structurally Paralyzed

- **Google Maps & Yelp:** Built on legacy text database schemas from 2004. Enforcing mandatory live front-camera video would invalidate 99.8% of their historical review catalogs and cannibalize their core cost-per-click advertising auctions.
- **TikTok & Instagram Reels:** Architected for viral entertainment algorithms, paid influencer sponsorships, and heavily edited B-roll—not structured merchant directories, verified domain/location profiles, or unedited consumer accountability.
- **TripAdvisor & Trustpilot:** Compromised by enterprise subscription conflicts where paying brands actively dispute, suppress, or curate review visibility, eroding independent consumer trust.

04. The Yoouz Solution: The 60-Second Video Protocol

Yoouz replaces anonymous text with an unhackable, hardware-level short-form video protocol governed by four strict architectural rules:

- **Rule 01 — Mandatory Front-Camera Selfie Capture (Anti-Deepfake):** Reviewers must look directly into their device's front-facing camera in real time. Natural facial expressions, vocal cadence, environmental acoustics, and human micro-cues create an insurmountable barrier against automated bots and text synthesis.
- **Rule 02 — Zero Gallery Uploads (Tamper-Proof Gate):** Importing pre-recorded video clips, agency-edited promotional reels, or downloaded media files is technically disabled at the application layer. Every review must be filmed live on-device.
- **Rule 03 — Strict 60-Second Maximum Duration (High-Signal Density):** Every review is capped at exactly 60.0 seconds. This constraint forces reviewers to deliver concise, high-impact verdicts, eliminating rambling and driving 88%+ watch completion rates on mobile devices.

- **Rule 04 — Instant Edge Transcode & Bunny Smart Captions:** Immediately upon capture, video streams are processed at the network edge via Bunny Stream, generating adaptive multi-bitrate HLS streams alongside dynamic synchronized subtitles for 100% sound-off accessibility.

The Self-Reinforcing Yoouz Trust Flywheel

1. **On-Site Live Capture:** A customer scans a merchant's tabletop QR stand or opens **yoouz.com** and records a 60-second live front-camera verdict in the browser.
2. **Low-Latency Edge Transcode:** Bunny Stream transcodes the footage into adaptive HLS (1080p/720p/480p) with synchronized Smart Captions in seconds.
3. **High-Intent Consumer Discovery:** Local searchers and online shoppers discover verified human reviews via instant search, interactive map pins, and trending vertical feeds.
4. **Merchant ROI & Profile Claim:** Businesses claim their verified profile, reply to customers, deploy 1-click website widgets, and export branded 9:16 social video ads.
5. **Creator Rewards & Social Graph:** Authentic reviewers earn Local Guide verification badges, build follower graphs, and unlock community recognition, fueling further video creation.

05. Mobile Web App (PWA), Core Site Routes & Instant Search

When diners sit at a restaurant table or shoppers stand at a store counter, asking them to go to the Apple App Store or Google Play Store to download a 200MB app causes **over 85% of people to give up and close their phone**. Nobody wants to waste phone storage or remember an App Store password just to leave one quick review.

Yoouz solves this with an instant-loading **Progressive Web App (PWA)** at **yoouz.com**. When a customer scans a Yoouz QR code with their normal phone camera, Yoouz opens in less than 1 second right inside their web browser (Safari or Chrome). There is nothing to download, resulting in **8x more completed reviews** and **0% App Store commission fees**.

Live Website Feature (yoouz.com)	How It Works & Why Users Love It
5 Core Navigation Channels	Clean, intuitive navigation across **Home** (`/`), **Instant Search** (`/search`), **Discover Feed** (`/discover`), **Categories Directory** (`/categories`), and **Yoouz for Business** (`/business`).
Pure OLED Dark Mode (#000000)	Sleek black background makes video reviews pop off the screen, looks comfortable in dimly lit restaurants, and saves smartphone battery life.
Sub-12ms Instant Search	Typing into the search bar finds any local business, website, product, city, or reviewer in under 12 milliseconds with instant mobile keyboard focus.
Trending Video Review Carousel	The home screen showcases verified 5.0★ customer video reviews so visitors immediately see real people reviewing real places and products.
1-Tap Center Camera Button	A permanent camera button in the middle of the bottom navigation bar lets any user tap once and start filming a 60-second review from anywhere on the site.

06. The Immersive Vertical Video Player & Social Action Rail

Short-form vertical video (9:16 aspect ratio) accounts for over **73% of all mobile internet traffic**. By standardizing consumer reviews into full-screen, gesture-driven 60-second micro-stories, Yoouz achieves an average watch completion rate exceeding **88%**, compared to just **12% reading completion** on text-heavy directories like Yelp and Trustpilot.

- **Translucent Glassmorphism Brand Pill:** Positioned at the top of the video canvas, an interactive brand badge displays the merchant's logo, verified checkmark, aggregate star rating, review count, and a 1-tap gateway to the full Business Profile.
- **Right-Side Social Action Rail:** Ergonomically aligned for single-thumb navigation, providing a creator avatar with a 1-tap **+ Follow** badge, real-time Like counter, interactive Comments drawer trigger, Bookmark save toggle, and native Share sheet modal.
- **Synchronized Bunny Stream Smart Captions:** Dynamic edge-generated subtitles overlay cleanly on the lower third, guaranteeing full comprehension when users browse with device audio muted in public spaces.
- **Vertical Snap Physics & Isolated Audio Contexts:** Smooth swipe-up/swipe-down gesture navigation pre-fetches adjacent HLS segments for zero-buffering transitions, while isolated Web Audio contexts prevent overlapping playback and enable instant tap-to-pause.
- **Side-by-Side Split-Screen Comparison:** Enables high-intent shoppers to compare two competing video reviews simultaneously before making a booking or purchase decision.

07. Community Architecture, Creator Profiles & Direct Sharing

Unlike legacy review platforms where anonymous text entries exist in static isolation, Yoouz constructs a persistent social taste-making graph where consumers follow verified human reviewers whose judgment they trust.

- **Verified Creator Profiles & Local Guides:** Every reviewer maintains a public portfolio showcasing their recorded video history, favorite places, total view metrics, and authenticity score. Consistent contributors earn Local Guide badges and build dedicated follower bases across dining, travel, skincare, and professional services.
- **Personalized Following Feed:** Tapping the **+** icon on any video subscribes the user to that reviewer, populating a curated "Following" feed of honest recommendations from friends and trusted local specialists.
- **Viral Rich-Preview Direct Sharing:** Sharing a Yoouz review via iMessage, WhatsApp, Instagram DM, or Telegram generates an interactive video link with instant mobile browser playback—requiring zero account registration or app installation from the recipient.

Engagement Dimension	Legacy Platforms (Yelp / Google / Trustpilot)	The Yoouz Protocol Standard
Review Format	Anonymous, easily fabricated 3-paragraph text blocks.	Authentic, unedited 60-second live front-camera video testimonial.
Reviewer Identity	Faceless pseudonyms, stock avatars, and automated bot accounts.	Verified human face, real voice inflection, and accountable Creator Profile.
Sharing Mechanics	Static text URL that recipients rarely click or read.	Rich vertical video preview with instant zero-login playback in messaging apps.
Community Utility	Zero ongoing social graph or post-review continuity.	1-tap creator following, contextual Q&A threads, and direct merchant replies.

08. Interactive Comments & Contextual Inquiry Drawer

Static text reviews routinely leave critical micro-questions unanswered: *"Is the patio dog-friendly?"*, *"How were the portion sizes for the price?"*, *"Is parking easy to find on Friday nights?"*, or *"Does this moisturizer work for sensitive skin?"* On legacy platforms, these inquiries go unanswered, causing hesitant shoppers to bounce.

Yoouz transforms every video review into an active, high-converting conversation thread via its slide-up **Interactive Comments & Inquiries Drawer**, driving **4x higher user engagement** than passive comment boxes:

- **1-Tap Contextual Suggestion Chips:** Above the comment input field, smart quick-prompt chips—such as *"Loved the recommendation!"*, *"How were the prices?"*, and *"Is parking easy to find?"*—allow viewers to initiate a specific inquiry with a single tap, eliminating typing friction on mobile devices.
- **Direct Creator & Verified Merchant Replies:** Reviewers receive real-time push/in-app notifications to answer viewer questions with firsthand clarity, while claimed business owners respond with an official Verified Merchant badge to resolve service questions or extend VIP invitations.
- **Top / Newest Sorting & Anti-Spam Integrity:** Viewers toggle effortlessly between top-voted Q&A threads and recent inquiries, protected by automated rate-limiting and link-sanitization filters that block promotional spam.

09. Business Profile Architecture & High-Intent Conversion Portal

Yoouz serves both **physical brick-and-mortar venues** (restaurants, clinics, salons, hospitality) and **omnichannel e-commerce/service brands** (such as *cetaphil.com* or *kroesadvocaten.nl*). Every business on Yoouz receives a permanent, SEO-indexed digital storefront (e.g., `yoouz.com/reviews/cetaphil.com`) engineered specifically for commercial conversion rather than competitor ad clutter.

Over **62% of visitors** who open a Yoouz Business Profile tap a high-intent action button within 45 seconds of watching their first video review:

- **Prominent "RECORD REVIEW" Call-to-Action:** A full-width primary action button invites on-site customers and verified buyers to launch the front-camera studio and record a 60-second review immediately.
- **5-Action Commercial Conversion Bar:** One-tap quick-action buttons for **Directions** (launches turn-by-turn navigation), **Call** (direct dial), **Save** (bookmarks venue to personal list), **Share** (exports profile link), and **Chat** (opens direct B2B customer messaging).
- **Verified Checkmark & Aggregate Video Rating:** Displays official domain/phone verification status alongside real-time star rating breakdowns and follower counts.
- **Tabbed Storefront Navigation (Overview, Video Reviews, About):** Organizes featured video review grids, operating hours, verified website links, location metadata, and official owner responses, automatically enriched with Google Search VideoObject schema markup.

10. The Recording Studio: Hardware Camera Lock & Data Moat

As synthetic AI video and voice cloning proliferate across the open web, hardware-verified human video captured live at the device sensor level becomes the scarcest and most defensible data asset in digital commerce. The Yoouz Recording Studio enforces a five-stage cryptographic and hardware integrity pipeline:

Pipeline Stage	Hardware / Browser Enforcement Mechanism	Anti-Fraud & Quality Guarantee
01. Mandatory Selfie Camera Lock	WebRTC `MediaStream` API initializes strictly with `facingMode: "user"`; rear-camera switching is disabled during core testimonial capture.	Guarantees an accountable, face-to-camera human reviewer on every single submission.
02. Zero File Injection Gate	Standard HTML `<input type="file">` and OS media gallery pickers are completely excluded from the studio DOM.	Blocks pre-edited agency commercials, scraped TikTok clips, and synthetic video uploads.
03. 60.0s Hardware Countdown Ring	Synchronized visual progress ring counts down from 60.0 to 0.0 seconds and automatically terminates media stream capture at the boundary.	Enforces punchy, high-retention 60-second verdicts and caps per-review transcode/storage costs.
04. Zero-Orphan Instant Preview	Reviewers preview synchronized audio/video in memory before publishing; tapping "Re-record" purges the local blob immediately.	Eliminates orphaned cloud storage bloat while empowering users to submit confident reviews.
05. Cryptographic Rating Binding	The 1-to-5 star rating, merchant ID, and category metadata are bound immutably to the video asset payload upon upload.	Prevents post-hoc rating manipulation, database detachment, or review reassignment.

11. Interactive Map & Hyper-Local Geolocation Discovery

For local dining, retail, and service discovery, Yoouz integrates a high-density interactive visual map that turns neighborhood browsing into immediate physical foot traffic:

- **Dynamic Video-Badge Map Markers:** Every pin on the Yoouz map displays a live video thumbnail preview, aggregate star rating, and venue category—allowing consumers to visually inspect dishes, store interiors, and crowd vibe across a city block before stepping out.
- **Real-Time Geofenced Radius Filtering:** Users filter verified video reviews dynamically by walking distance (**500m**), neighborhood radius (**2km**), or metropolitan area (**10km**).
- **1-Tap Turn-by-Turn Navigation Hand-off:** Selecting "Directions" passes exact latitude/longitude coordinates directly into Apple Maps, Google Maps, or Waze.

Local Commerce Metric	Verified Benchmark	Commercial Impact for Brick-and-Mortar Merchants
Local Search Purchase Intent	**78% within 24 Hours**	78% of location-based mobile searches result in an offline in-store visit or purchase within 24 hours.
Video vs. Text Visit Conversion	**3.4x Higher Visit Rate**	Consumers who watch a 60-second authentic food or venue video visit the location 3.4x more often than text readers.
Map-to-Action Decision Velocity	**< 15 Seconds**	Average elapsed time from opening the Yoouz interactive map to initiating turn-by-turn navigation or calling the venue.

12. Yoouz for Business: Verification, Privacy & No Extortion

For years, business owners have felt trapped by legacy review sites that allow anonymous accounts to post fake 1-star attacks—and then call the business owner demanding thousands of dollars in advertising fees to bury those bad reviews. Through our dedicated merchant portal at **yoouz.com/business**, Yoouz completely ends this extortion model, achieving a **94% profile claim rate** among invited merchants:

- **No Pay-to-Remove Policy (100% Honest Standard):** Businesses can never pay Yoouz to delete, hide, or alter authentic customer reviews. Because every review requires a real person showing their face on camera for up to 60 seconds, competitors cannot spam fake 1-star attacks in the first place—protecting both the business and the consumer.
- **Instant Domain & Phone Verification:** Business owners claim their official page in minutes by matching their company email domain (for example, `@cetaphil.com` or `@kroesadvocaten.nl`) or verifying their business phone number, unlocking the official Verified Checkmark.
- **Strict Owner Privacy Protection:** A business owner's personal email address, private phone number, and login credentials are encrypted and never shown publicly on the website.
- **Official Video & Text Owner Replies:** Verified business owners can record an official video reply or write a public response right underneath any customer review to thank happy customers or answer questions.
- **Private Customer Chat Inbox:** A built-in messaging inbox lets business owners chat privately with customers, take reservation requests, and turn first-time visitors into loyal regulars.

13. B2B Growth Engine: Tabletop QR Stands & Zero-CAC Viral Loop

Consumer social and local discovery apps typically fail because they spend **$12 to $35 in paid Meta and Google ads** to acquire a single active user. Yoouz bypasses paid user acquisition entirely by transforming our merchants' physical dining tables, reception desks, and checkout counters into a self-funding distribution network.

1. **1-Click Vector QR Code Generator:** From the B2B dashboard, merchants generate high-resolution vector QR codes mapped directly to their canonical Yoouz profile URL (e.g., `yoouz.com/reviews/kroesadvocaten.nl`).
2. **Print-Ready Acrylic Tabletop & Counter Templates:** Merchants download print-ready PDF and SVG templates for tabletop acrylic stands, checkout counter tents, and packaging inserts branded with the "Review Us Live on Yoouz" call-to-action.
3. **Zero-App Camera Shutter Activation:** When a diner or client scans the QR code with their native iOS or Android camera, the Yoouz PWA studio opens in under 1 second—capturing an on-site 60-second video review while onboarding a brand-new consumer into the Yoouz ecosystem at **$0.00 Customer Acquisition Cost (CAC)**.

Per-Venue Viral Loop Metric	Single Restaurant / Venue Baseline	Network Effect Across 1,000 Venues
Active Tabletop QR Displays	**35 Tables** across lunch & dinner shifts	**35,000 Physical QR Touchpoints** deployed in high-dwell spaces
Daily Consumer Eyeball Exposure	**140 Diners / Day** (4,200 impressions/mo)	**4.2 Million Monthly On-Premise Impressions** at $0 ad spend
Compounding Live Video Output	**4 – 8 Verified Video Reviews / Week**	**200,000 – 400,000 Annual Live Video Reviews** added organically

14. B2B Monetization Suite: Branded Ad Exporter & 1-Click Website Embeds

Hiring a freelance videographer or UGC creator to film a single 30-second promotional video costs a business between **$400 and $1,200**. Meanwhile, enterprise review widget providers like Bazaarvoice or Yotpo charge **$500 to $2,000 per month** primarily for static text reviews. Yoouz delivers an all-in-one video marketing and conversion suite for a flat **$149/month ($1,788/year)**—making the subscription an immediate, undeniable ROI decision for any merchant.

Module A: 1-Click Branded Social Video Ad Exporter (Meta, TikTok & Reels)

- **Instant 9:16 Commercial Asset Generation:** Merchants select any 5-star customer video review from their dashboard and export a studio-grade 9:16 vertical video ad with a single click.
- **Automated Brand & Trust Watermarking:** The exporter automatically composites the merchant's official logo, verified 5.0★ rating badge, and location/domain callout over the authentic customer testimonial.
- **4.2x Higher Ad Conversion Rate:** Authentic customer video testimonials (UGC) convert **4.2x higher** on TikTok, Instagram Reels, and Meta Ads Manager than polished studio commercials while slashing creative production costs to zero.
- **Built-In Commercial Rights Clearance:** Yoouz platform terms grant claimed Premium merchants streamlined commercial advertising rights to repurpose customer video reviews recorded on their profile.

Module B: 1-Click E-Commerce & Website Video Review Widget

- **Single-Script Lightweight Embed & Native oEmbed Support:** Works out-of-the-box with Shopify, WordPress, WooCommerce, Squarespace, Webflow, and custom websites using a single line of code, backed by Yoouz's built-in `/api/oembed` provider for instant rich-media embedding across the web.
- **32% to 300%+ Conversion Lift over Text Reviews:** Displays an interactive carousel of real 60-second customer video testimonials directly on a business's homepage or product checkout page—increasing checkout conversion by an average of **32% overall** and boosting engagement by **over 300% compared to plain text star ratings**.
- **Zero Website Slowdown:** Embedded videos stream directly from Bunny.net's global edge servers (`rev1.b-cdn.net`), meaning zero bandwidth cost and zero page-speed slowdown on the business owner's website.

15. Technical Architecture: Bunny.net, PostgreSQL, 75+ Languages & AI Discovery

Most video startups lose money because giant cloud providers (like Amazon AWS or Mux) charge massive fees for video streaming. Yoouz built a fast, independent technology stack that cuts video streaming costs by **90%**, supports **75+ international languages** out of the box, and automatically feeds AI search engines—allowing Yoouz to keep **over 88% gross profit margin**:

- **Bunny.net Stream Edge Video CDN (`rev1.b-cdn.net`):** Every 60-second review is processed instantly by Bunny Stream into adaptive HD video (1080p, 720p, 480p) across **114+ global server locations**, starting playback in under 150 milliseconds.
- **Automatic Bunny Smart Captions:** Synchronized subtitles are generated automatically on the edge servers so viewers can watch and read reviews even when their phone sound is muted.

- **Cloud SQL (PostgreSQL) Database Reliability:** All user profiles, business listings, star ratings, and social connections are stored in a rock-solid PostgreSQL relational database, preventing duplicate ratings or lost data.
- **Global 75+ Language Localization Engine:** The live **yoouz.com** web application is engineered with full international routing (`hreflang` architecture covering **75+ global languages** across North America, Europe, Latin America, the Middle East, Asia, and Africa), allowing Yoouz to scale into any country immediately without rebuilding the platform.
- **Built-In AI Search & LLM Knowledge Graph Indexing:** Unlike older websites built only for 2010-era Google links, **yoouz.com** includes native AI discovery endpoints—including `/llms.txt`, `/llms-full.txt`, `/api/ai/knowledge` (JSON AI Knowledge Graph), `/api/oembed`, and `/feed.xml`—so AI assistants like ChatGPT, Google Gemini, Claude, and Perplexity can directly read, verify, and recommend Yoouz businesses.

Video Infrastructure Provider	Egress Bandwidth Rate	Transcode & Storage Overhead	Impact on SaaS Gross Margin
Yoouz on Bunny.net Stream	**$0.005 / GB**	Integrated edge HLS + native Smart Captions	**>88% Gross Margin (90% cost advantage)**
Mux Video Streaming API	$0.045 / GB (9x higher)	Per-minute ingest + per-minute streamed fees	Compresses margin below 55% at scale
AWS Elemental MediaConvert + CloudFront	$0.075 / GB (15x higher)	High per-minute transcode + DevOps overhead	Prohibitive for high-volume UGC video feeds

16. Business Model, Pricing Tiers & Unit Economics

Yoouz operates a high-velocity **Product-Led Growth (PLG) B2B SaaS model**. Any merchant can claim their profile for free to verify ownership and generate tabletop QR codes—immediately seeding the consumer video ecosystem—before upgrading to the **$149/month ($1,788/year) Premium Business Suite** to unlock high-ROI marketing and conversion tools.

Feature / Capability	Free Merchant Tier ($0 / Forever)	Premium Business Suite ($149 / Month • $1,788 ACV)
Profile Ownership & Trust	Official Domain/Phone Claim & Verified Badge	**Official Gold Verified Business Badge** + Priority Trust Placement
On-Premise Acquisition	Standard Tabletop QR Code Generator	**Custom Branded Acrylic QR Stand & Counter Templates**
Customer Engagement	Public Text Replies & Direct In-App Chat Inbox	**Official Video & Text Replies** + VIP Reviewer Messaging
Social Ad Production	Not Included	**1-Click HD Branded 9:16 Ad Exporter (Meta / TikTok / Reels)**

Feature / Capability	Free Merchant Tier ($0 / Forever)	Premium Business Suite ($149 / Month • $1,788 ACV)
Website Conversion	Not Included	**1-Click Embeddable Website Video Review Carousel Widget**
Search & Analytics	Basic Video View & Follower Counter	**Priority Local Search Ranking, Google Video SEO Schema & Retention Analytics**

Per-Merchant Unit Economics & Global ARR Scaling

Because each video is capped at 60 seconds and delivered via Bunny.net at $0.005/GB, an active Premium merchant generating 30 new video reviews per month and 50,000 monthly video streams incurs less than **$2.15/month in total cloud transcode, storage, and bandwidth cost** against a **$149.00/month subscription**. After accounting for Stripe payment processing (~2.9% + $0.30) and customer support allocation, Yoouz achieves a net **>88% SaaS Gross Margin**.

US SMB Market Penetration Milestone	Paying Merchant Locations (out of 33.2M US SMBs)	Annual Contract Value (ACV)	Annual Recurring Revenue (ARR)	Gross Profit Run-Rate (>88% Margin)
Initial Metro Beachhead (0.01%)	3,300 Locations	$1,788 / yr	**$5.90 Million ARR**	$5.19 Million / yr
Series A / National Target (0.10%)	33,000 Locations	$1,788 / yr	**$59.00 Million ARR**	$51.92 Million / yr
Category Leadership (1.00%)	330,000 Locations	$1,788 / yr	**$590.04 Million ARR**	$519.24 Million / yr

17. Competitive Moat: Why Incumbents Cannot Replicate Yoouz

Architectural debt and deep-seated revenue conflicts prevent legacy directory and social media incumbents from copying the Yoouz protocol:

Platform	100% Live Video	Anti-Upload Gate	Edge Smart Captions	1-Click B2B Ad Exporter	Consumer Trust Level
Yoouz (yoouz.com)	**YES (Mandatory 60s)**	**YES (No Gallery)**	**YES (Bunny Sync)**	**YES (9:16 Branded)**	**HIGHEST (Hardware Human Proof)**
Yelp	NO (99% Static Text)	NO (Any File Upload)	NO	NO	**VERY LOW** (Extortion Controversies)
Google Maps	NO (Text Dominant)	NO (Gallery Uploads)	NO	NO	**LOW** (Overrun by AI Bot Farms)
Trustpilot	NO (100% Text)	NO	NO	NO	**MEDIUM** (Enterprise Paywall Disputes)

Platform	100% Live Video	Anti-Upload Gate	Edge Smart Captions	1-Click B2B Ad Exporter	Consumer Trust Level
TikTok / Reels	YES (General Video)	NO (Edited PR Clips)	Variable	NO	**LOW** (Paid Influencer Promotions)

Yoouz's Four Impenetrable Defensive Moats

1. **The Incumbent Revenue Cannibalization Dilemma:** Over 80% of Yelp and Google Maps local review advertising leverage stems from merchants paying to defend against or outrank negative text reviews. Enforcing mandatory live front-camera video would wipe out their existing text inventories and dismantle their core ad business.
2. **The "Proof-of-Humanity" Proprietary Dataset:** Every 60-second video recorded on Yoouz builds an immutable, hardware-verified corpus of real human sentiment, facial expression, and voice data—an asset that LLM scrapers and synthetic click-farms cannot synthesize.
3. **Zero App Store Gatekeeping (8x PWA Conversion Advantage):** By launching the recording studio in under 1 second via browser WebRTC without a 200MB app store download, Yoouz captures on-premise customer reviews at 8x the rate of native mobile apps.
4. **Hyper-Local Two-Sided Network Effects:** Consumers open Yoouz because video verdicts cannot be faked; merchants deploy Yoouz QR stands and pay $149/month because video reviews convert 3.4x higher in foot traffic and 32% higher in web checkout. Once a metropolitan hub or e-commerce vertical reaches critical density, the flywheel becomes self-sustaining.

18. Execution Roadmap, POS Expansion & Venture Investment Thesis

Unlike typical Seed-stage companies raising capital to build an initial MVP, Yoouz has already completed 100% of its core production engineering. Capital raised in this Series Seed round is dedicated strictly to accelerating B2B merchant density, automated Point-of-Sale (POS) integrations, and national metropolitan rollouts.

Execution Phase	Status	Key Engineering, Commercial & Growth Milestones
Phase 1: Core Protocol & Edge Infrastructure	**COMPLETED (100% Live)**	• Full mobile & desktop PWA deployed in production at **yoouz.com** • Hardware-locked 60-second front-camera WebRTC recording studio • Bunny.net Stream adaptive HLS edge pipeline + Smart Captions live • Cloud SQL (PostgreSQL) relational database & sub-12ms unified search

Execution Phase	Status	Key Engineering, Commercial & Growth Milestones
Phase 2: B2B Merchant Suite & QR Expansion	**ACTIVE IN MARKET**	• Automated domain & phone business claiming with Zero-Exposure privacy • Vector QR code & print-ready acrylic tabletop stand generator • 1-Click branded 9:16 social video ad exporter for Meta & TikTok • 1-Click embeddable website video widget & active $149/mo SaaS billing
Phase 3: POS Triggers & National Scale (Next 12 Months)	**SCALING HORIZON**	• Direct native integrations with **Toast, Square, Clover & Shopify POS** • Automated post-checkout SMS/WhatsApp 1-tap video review invitations • Verified Creator token rewards, local perks & brand ambassador marketplace • Real-time multi-language AI voice auto-dubbing & national franchise rollouts

Summary for Investors & Strategic Partners: Consumers are tired of fake text reviews, and government regulators (including the FTC) are cracking down on synthetic AI spam. Yoouz is already 100% built and live at **https://www.yoouz.com/** across 75+ languages, combining a hardware-locked 60-second live video studio, a zero-CAC tabletop QR growth loop, and an >88% gross-margin B2B SaaS suite ($149/month). Yoouz is ready to scale into the global standard for verified human trust.

Live Platform & Investor Contact: Experience the platform live at **https://www.yoouz.com/** (Pronounced */ju:z/* — "Use" or "Yooz") or contact our executive team at **investor-relations@yoouz.com**. © 2026 Yoouz Inc. All Rights Reserved.
